

Water Treatment on July 27, 2015

PLM Lake and Land Management Corp. performed their scheduled weed and algae treatment and water quality assessment on July 27, 2015. Eurasian milfoil was found and treated in a number of areas with Diquat Dibromide, chemical trade name Tribune. There were just some scattered plants in those areas. All in all, the lake looks good.

Chemical product/active ingredient	Chemical trade name	Do Not Use this water for swimming or bathing until	Do Not Use this water for ornamentals or turf irrigation until	Do Not Use this water for domestic purposes or agriculture irrigation until	Do Not Use this water for livestock watering or similar purposes until
Diquat Dibromide	Tribune	1 Day(s)	3 Day(s)	5 Day(s)	1 Day(s)

For a complete listing of all product labels, please see the [PLM website](#).

The chemicals used for Aquatic Nuisance Control are registered by the U.S. Environmental Protection Agency and the Michigan Department of Agriculture. The potential for damage to fish and other non-target organisms is minimal provided that the product is used as directed on the product label and the permit. To minimize the possible effects on health and the environment, the treated water is restricted for the above purposes.

The areas of the lake that were treated are shown on the map below:
